Appendix 3. Relationship between respondents' education level and age

The respondents' education level and age were highly negatively correlated (Spearman correlation: ρ=-0.68, df=71, p < 0.001, Fig. A3.1).

Fig. A3.1: The relationship between the respondents' age and education level. The thick horizontal bars in the box represent the median, bottom and top of the box are the 25th and 75th percentiles respectively. Whiskers extend until the lowest and highest value.
