

**Appendix #1** Additional information on granting programs and journals that papers were published in.

Table A1.1 NSF granting programs that funded SES research between 2000-2015.

NSF Directorate	Grant Programs
Engineering	Real-time Machine Learning, Environmental Sustainability, Humans Disasters and the Built Environment
Computer & Information Science & Engineering	Smart Connected Communities
Biology	LTER, Ecosystem Sciences, Ecology and Evolution of Infectious Disease
Geosciences	Hydrology, Geomorphology and Land Use Dynamics, EPSCOR
Social, Behavioral & Economic Sciences	Critical Resilience Infrastructure Systems and Processes, Science of Learning Collaborative Networks
Crosscutting	Coupled Natural Human

Table A1.2: List of all journals that were published in and associated disciplinary categories. If the journal had three or more publications from our dataset, we evaluated whether the mission of the journal explicitly or implicitly included “interdisciplinary”. If the description / mission of the journal explicitly included the word “interdisciplinary” we coded that as “yes”, if the word was not used but was implicit in the description of the types of papers in the journal this was considered “implicit”, and if neither of those conditions were met then it was “no”. If there were less than three papers published in a given journal they were not evaluated and given a “N/A”.
